DEEP DIVE INTO A PAIR OF MOEA

Shoes have always had to be made out of leather. Not anymore. Nowadays, science offers us a unique opportunity to replace animal leather with new innovative materials made from fruits and plants: bio-materials.

At MoeA we currently use 9 of them:

- | | | | |
|---------------|---|--------------|---|
| Appleskin | ● | PET Bottle | ● |
| Pineappleskin | ● | Orangeskin | ● |
| Cactuskin | ● | Mushroomskin | ● |
| Grapeskin | ● | Bananayarn | ● |
| Cornskin | ● | | |

Mother Earth (MoEa) sneakers brand // attempt to rethink the way we produce fashion goods in the respect of Mother Earth
Bio-based, animal-free and recycled materials are at the core of our project.

DEEP DIVE INTO A PAIR OF MOEA

Upper : Biomaterial, up to 100% of Plant & Fruit
Sole : Made in Portugal, 40% recycled Rubber
Lining : 80% recycled Bamboo
Laces : 100% organic Cotton
Glue : Water-based

Handcrafted in Portugal.

As of 2023, we are a proudly Peta-certified
Vegan company.

A pair of sneakers is shown in the process of being made, surrounded by a cloud of wood shavings. The sneakers are white with brown accents and have the brand name 'MOEA' visible on the side. The background is a dark, industrial setting with a large mill or grinder. Four white plus signs are placed in the corners of the image.

SUSTAINABLY MADE IN EUROPE

We are committed to producing sneakers that are vegan and low-carbon, but also made locally. To do so we use vegan and clean materials made in Europe, work with certified factories in Portugal and rely on the latest innovations in the bio-materials industry.

(VERY) LOW CARBON SNEAKERS

Our LCA studies prove that on average, our bio-materials emit 89% less carbon than conventional leather. This feat enables our MoEa GEN.1 to emit 4kg of CO₂, 5 times less than a traditional sneakers.

WWF PARTNER TO RESTORE FORESTS

MoEa donates 1% its sales to fight against deforestation by contributing to WWF's reforestation programs. In 2021, we were introduced to the WWF Start-Up Club. Only three brands are selected every year. We are proud to be recognized by this institution for having a positive impact for the environment and animal life.
